			F	aculty	/ of Ele	ctrical	Engin	eering				
Field of study	Electronics and Telecommunication type						Bachelor's degree					
Specialization/ diploma path				-				Study profile	-			
Course name	Embedded Systems		Course code	IS-FEE-10043S								
								Course type	elective			
Forms and	L	С	LC	Р	SW	FW	S	Semester	summer			
of tuition	15				15			No. of ECTS credits	3			
Entry requirements							•					
Course objectives	To acquaint students with embedded systems and to help them acquire practical skills in the configuration of embedded systems based on Linux.											
Course content	Commercial and technical reasons to use embedded systems. Generic architecture of embedded linux systems. Basic shell commands. Efficient tools to generate embedded Linux systems: crosstool-ng, busybox, buildroot, OpenWRT. Configuring and compiling the kernel. Booting a Linux system. Examples of use of embedded systems											
Teaching methods	lecture and specialization workshop											
Assessment method		lecture - test; specialisation workshop - evaluation of reports

## COURSE DESCRIPTION CARD

LO3	evaluating students' reports, observation of work in class SW						
LO4	evaluating students' reports, observation of work in class	S	W				
LO5							
	No. of hours						
	Lecture attendance:	15					
	Participation in specialisation workshop:	15					
	Required reading	1	5				
Calculation	Work on reports	15					
	Participation in student-teacher sessions:	4					
	Preparation for specialisation workshop:	15					
	Preparation for the final test:	4					
		- 					
	TOTAL:	83					
	Quantitative indicators	HOURS	No. of ECTS credits				
Student wor	35	1,5					
	59	2
