

## COURSE DESCRIPTION CARD

Faculty of Civil Engineering and Environmental Sciences										
Field of study								Degree level and programme type		
Specialization/ diploma path								Study profile	Academic profile	
Course name	General building engineering							Course code	IS-FCEE-00216W	
								Course type	Erasmus	
Forms and number of hours of tuition	L	C	LC	P	SW	FW	S	Semester	winter	
	30	30		30				No. of ECTS credits	6	
Entry requirements	Technical drawing & engineering graphics, Civil engineering materials, Strength of materials									
Course objectives	The purpose of this module is to present students with: main elements and systems of buildings construction; principles of loads combinations; construction of selected elements of buildings; principles of preparation of engineering drawings of buildings with brick walls.									
Course content	<p>L: Traditional building engineering. Classification of buildings. Elements of buildings and building structures. Spatial rigidity of buildings. Expansion joints. Technical specifications for buildings and their location according to Polish building law. Foundations. Building with brick walls. Chimney walls. Ceilings. Staircases. Steep and flat roofs. Roofings. Windows and doors. Insulations. Finishing elements.</p> <p>C: Load combinations, calculation of loads. Simplified calculations of selected building elements.</p> <p>P: Specification and technical drawings of a building built from bricks</p>									
Teaching methods	A series of lectures to provide students with an overview of the issues relating to the main elements and systems of building construction, principles of load combinations; construction of selected elements of buildings. A series of classes covering actions on buildings, load calculations and calculation of simple structural elements. Project consisting in specification and technical drawings of a building built from bricks.									
Assessment method	L - written exam; C - written evaluation; P – completion of the student's project, written evaluation, defense of the student's project;									
Symbol of learning outcome	Learning outcomes							Reference to the learning outcomes for the field of study		
LO1	Student (graduate) has a basic knowledge regarding designing and construction of selected objects							K_B1_W05, K_B1_U02		
LO2	Student (graduate) knows standard rules, regulations and building codes							K_B1_W07, K_B1_W11		
LO3	Student (graduate) recognizes and classifies different construction objects							K_B1_U02		

<b>L04</b>	Student (graduate) determines and combines loads acting on elements of construction objects	K_B1_U03	
<b>L05</b>	Student (graduate) selects and applies construction materials in designed objects	K_B1_U05, K_B1_U07	
<b>L06</b>	Student (graduate) prepares specification and technical drawings of simple construction objects	K_B1_U04, K_B1_U08	
<b>Symbol of learning outcome</b>	<b>Methods of assessing the learning outcomes</b>	<b>Type of tuition during which the outcome is assessed</b>	
<b>L01</b>	written exam, written evaluation of class and project, completion and defense of the student's project, completion of the calculation exercise	L, C, P	
<b>L02</b>	written evaluation of class and project, completion and defense of the student's project, completion of the calculation exercise	C, P	
<b>L03</b>	written exam	L	
<b>L04</b>	completion of a calculation exercise, written evaluation	C	
<b>L05</b>	completion and defense of the student's project, written evaluation	P	
<b>L06</b>	completion and defense of the student's project, written evaluation	P	
<b>Student workload (in hours)</b>		<b>No. of hours</b>	
<b>Calculation</b>	lecture attendance	30	
	participation in classes, projects, etc.	45	
	preparation for classes, projects, seminars, etc.	30	
	working on projects, reports, etc.	30	
	participation in student-teacher sessions related to the classes/seminar/project	5	
	participation in examination	2	
	preparation for and participation in exams/tests	25	
	<b>TOTAL:</b>	<b>167</b>	
<b>Quantitative indicators</b>		<b>HOURS</b>	<b>No. of ECTS credits</b>
<b>Student workload – activities that require direct teacher participation (30+45+5+2)</b>		82	3,0
<b>Student workload – practical activities</b>		110	4
