LO4	Student is able to obtain information from the literature and databases about different types of heaters, radiators, installations etc. Student can compare knowledge from different sources, interpret data, make conclusions, formulate and justify own opinions.	
LO5	Student is able to work individually and in a team during the laboratory course and can estimate the time needed for the study.	
LO6	Student can make the heating installation design, prepare the technical description and explain the scope of the project.
