COURSE DESCRIPTION CARD

			I	Faculty of	of Electri	ical Engi	neering				
Field of study	Electrical and Electronics Engineering Degree level and programme type							Bachelor's degree			
Specialization/ diploma path				-				Study profile			
Course name		Inetri	ımontati	on and N	Course code	IS-FEE-10047S					
		msuc	ııııcıılalı	on and n	Course type	elective					
Forms and	L	С	LC	Р	SW	FW	S	Semester	summer		
number of hours of tuition	15		30					No. of ECTS credits	5		
Entry requirements						-					
Course objectives	To understand the basic working principles of electrical and electronic measuring instruments. To receive the skills to managing and operating analogue and digital instruments for a particular application. To learn the ways of presenting and interpreting results. To calculate the uncertainty of the direct and undirect single and multiple measurements.										
Course content	Introduction to metrology and measuring instruments; errors and uncertainties; instrument transformers and their applications; resistance, voltage and current measurements; power and energy measurements; impedance measurement; frequency measurement; analog-to-digital converters; digital oscilloscope.										
Teaching methods	lecture, laboratory classes										
Assessment method	lecture - written exam; laboratory classes- evaluation of written report, assessment of preparation to do exercises, evaluation of completing a measurement task.										
Symbol of learning outcome	Reference to the learning outcomes the field of study						learning outcomes for				
L01	interprets the results of measurements and presents them in an appropriate form										
LO2	perform	s propre	measure	ments of	f electrica	al quantiti	es				
LO3	calculat	es limitin	g errors	and unce	rtainties						
LO4						asic elect					
LO5	implements and operates appropriate equipment in a measuring experiment										
Symbol of learning outcome	Methods of assessing the learning outcomes						Type of tuition during which the outcome is assessed				
L01	passing exam	short tes	sts before	e laborato	ory class	es, makir	ng a repo	rt, passing an	ng an L, LC		
LO2	making	a report	about lab	oratory e	exercise,	completi	ng a mea	asurement task	surement task LC		
LO3	making	a report.	passing	an exam	_				L,LC		

LO4	evaluation of completing a measurement task, passing an exam	L,LC					
LO5	evaluation of completing a measurement task, making a report	LC					
	No. of hours						
Calculation	lecture attendance	15					
	participation in classes, laboratory classes, etc.	30					
	preparation for classes, laboratory classes, projects, seminars, etc.	30					
	working on projects, reports, etc.	20					
	participation in student-teacher sessions related to the classes/seminar/project	10					
	implementation of project tasks	0					
	preparation for and participation in exams/tests	20					
	TOTAL:	125					
	HOURS	No. of ECTS credits					
Studen	57	2					
	Student workload – practical activities	90	3
