| <p>Description: Classes of this course relate to architectural design of educational facilities. The students' task will be to design a kindergarten or elementary school. During the course, students of ERASMUS Program learn the principles of art and methodology of architectural design, practical application of building solutions and applicable regulations. The result of the work will be the implementation of the project based on the analyzes carried out and the assumptions made during the classes. Excursions to existing educational facilities in Bialystok are planned during early phase of the project.</p> |   |             |                       |                       |             |
