	Architectural Design - Multifunctional building	P	5	75	12
<p>Description: The building is located in the city structure. The building responds to a complex urban context and enters into specific relations with the surroundings. The building has several functions, complementary or independent. It presents complex functional and spatial arrangement. The architectural form is individual with high aesthetic value. The construction and material solutions should be defined in a conceptual way.</p> <p>Suggested choices of the building's function and program:</p> <ul style="list-style-type: none"> <li>(1) a student dormitory with additional functions, e.g.: canteen, student club, study and work spaces, commercial and service rooms, and others,</li> <li>(2) a sports and recreational center with: gym, training room, wellness area (saunas, salt cave, jacuzzi, etc.), bar, shop, and others,</li> <li>(3) a museum or art gallery, with additional functions, e.g.: cafe, shop, meeting/presentation room, classroom, and others.</li> </ul> <p>List of required drawings: pre-project analyses - graphical presentation of the idea , location plan – scale 1:500 , floor projections – scale 1:100, 2 cross sections – scale 1:100, facades of the building – scale 1:100/1:200, at least 3 perspective views of the building.</p> <p>Method of the final presentation: portfolio – printouts of the panels in A3 size including digital record (in jpg or pdf format); a brief description of the project.</p>
