	Artistic expression	Ps	3	45	4
<p>Description: In the era of computerization we are the less and less able to use traditional techniques, such as drawing, which has become a manual skill of the past. They need a systematic 'review'. The project activities refer to students who want to consciously use the simplest form of artistic creation in various techniques i.e. drawing. Drawing has its own components. It is also an experimental field in the research component of artistic expression. Communication by drawing is an elementary link in the interpretation of reality. This ability is necessary not only to students of art universities.</p> <p>Moreover, students of the course will get acquainted with several other techniques of artistic expression in 2D and 3D, which are to stimulate their creativity.</p> <p>Thus, classes have form of exercises and activities in the studio, the exercises shall be of a practical character. Having passed the course the students should gain the following skills and knowledge:</p> <ul style="list-style-type: none"> - the ability to use own imagination and intuition; - knowledge how to use appropriate techniques to realization a arts work; - ability to create one's own artistic concepts having the necessary skills; - experience of skillful joining techniques of different fields of art; - develop their spatial imagination and artistic creativity.
