

Technical English B1+

Description:

You are going to learn the core language and skills that students need to communicate successfully in different technical and industrial specializations.

Depending on the group you are in, you'll study some of the following topics: laser technology, products from space research, design and construction, automotive assembly, robotics, sensors, developments, product launch, logistics, health and safety, destructive testing, non-destructive testing, hydro-electric power, maintenance, etc.

You will join an existing group of Polish students. That is why you'll have to meet Foreign Language Centre Erasmus Coordinator first. Please expect more information by e-mail before the beginning of the academic year.

Regular attendance and active participation are required.
