

Technical English B1+

Description:

Depending on the group, you'll study one of the following groups of topics:

1. oil and gas drilling, laser technology, products from space research, properties of materials, design specifications
2. iron and steelmaking, aluminium making, risk assessment, possible solutions in critical situations,

You will join an existing group of Polish students that is why you'll have to contact the FLC coordinator first. An informative meeting with the coordinator is planned in the first week of the semester, so please expect more information by email before the beginning of the academic year.

Requirements:

Ability to communicate in English at level B1 (intermediate - at least)

Regular attendance is required.
