

	Subject	type	hour/ week	hour/ sem.	ETCS
	Urban Design II	P	4	60	8
<p>Description: The objective of the course is NOT the utmost completing student's education on urban design and planning, as international students may have various level of preparation and training in urban design, and their homeland countries may have different juridical systems related to urban planning concepts. This is the reason course is divided for the different levels. The students who never had the experience with urban designing received more exercises (working alone), tasks to intervention (city acupuncture) in different city environments (example: housing districts, city centre, public spaces in campus). Other task will be design new activity cores in existing space in one of district in Bialystok, taking in consideration chosen urban fabrics. The students, who already have had the urban design courses, will have the task to design the activity cores in chosen part of downtown of Bialystok. Analyse urban fabrics, find main problems, synthesise conclusions and present urban projects which response for observed problems. Project is made by international teams (2-3 person). The skills and knowledge which student gain: the methodology of research related to the recognition, assessment, understanding and describing urban fabric, synthesise them and based on these aspects realize the project. The possibility of cooperation in international teams.</p>
