| Course content                    | The basics of the optical phenomena theory in semiconductors and optical waveguides. Low dimensional structures - the principle of the use of quantum wells in semiconductor emitters of radiation. Engineering of the photonic bang gap - super-network. Interfaces in photonic structures. Periodic optical structures - a construction of selected elements, methods of analysis and development perspectives. The construction and selected applications of the matrix of sources and detectors with low-dimensional structures. The phenomenon of optical bistability. Bistable photonic components. Optical logic elements. Nonlinear phenomena. |  |  |  |  |   |   |  |  |
| Teaching methods                  | Laboratory class   |  |  |  |  |   |   |  |  |
| Assessment<br>method              | evaluation of reports, tests of preparation for laboratory exercise.   |  |  |  |  |   |   |  |  |

## COURSE DESCRIPTION CARD

| LO6                      | measures and analyzes the spectroscopic properties of<br>materials used in photonics; |                      |             |  |  |  |
|--------------------------|---|----------------------|-------------|--|--|--|
| L07                      | represents contemporary trends photonics, finding their usefulness in technic;        |                      |             |  |  |  |
| LO8                      | understands the role of photonics in modern knowledge-<br>based society.              |                      |             |  |  |  |
| Symbol of                |   | Type of tui          | tion during |  |  |  |
| learning                 | Methods of assessing the learning outcomes  | which the outcome is |             |  |  |  |
| outcome                  |   | asse                 | ssed        |  |  |  |
| L01                      | evaluation of the report on exercise, a discussion during the laboratory classes;     |                      |             |  |  |  |
| LO2                      | evaluation of the report on exercise, a discussion during the laboratory classes;     |                      |             |  |  |  |
| LO3                      | evaluation of the report on exercise, a discussion during the laboratory classes;     |                      |             |  |  |  |
| LO4                      | evaluation of the report on exercise, a discussion during the laboratory classes;     |                      |             |  |  |  |
| LO5                      | evaluation of the report on exercise, a discussion during the laboratory classes;     |                      |             |  |  |  |
| LO6                      | evaluation of the report on exercise, a discussion during the laboratory classes      |                      |             |  |  |  |
| L07                      | discussion on the report of the exercise, observation of the work<br>in the classroom |                      |             |  |  |  |
| LO8                      | discussion on the report of the exercise, observation of the work in the classroom.   |                      |             |  |  |  |
