## COURSE DESCRIPTION CARD

			F	aculty	of Ele	ectrical	Engin	eering	
Field of study	Electrical and Electronic Engineering					gineeri	Degree level and programme type	bachelor's degree, full time programme	
Specialization/ diploma path	-						Study profile		
Course name	Ir	nage E	Process	sing ar	nd Rec	ognitic	Course code	IS-FEE-10022W	
	Course type elective							elective	
Forms and	L	С	LC	Ρ	SW	FW	S	Semester	winter
of tuition	15				30			No. of ECTS credits	4
Entry requirements	-								
Course objectives	To familiarize students with the knowledge of digital images, methods of their processing and recognition.								
Course content	Lectu meth distu trans deco syste meth Exan <u>Spec</u> proce meth objec Prese meth	<u>ecture</u> : Introduction to basic information about image and image processing methods: mathematical model of the image, the creation of digital images, disturbance models, image histogram alignment, context filters, morphological transformations, contouring and segmentation algorithms. Image compression and decompression methods. Image recognition tasks, application of image analysis systems. Classification of recognition methods: minimum distance methods, pattern methods, approximation methods, special methods, probabilistic methods, tree methods, graph methods. Cluster analysis and classification in the feature space. Examples of image recognition systems: face recognition systems, vision systems. <u>Specialization workshop</u> : Testing and evaluation of selected image processing procedures on given digital images. Application of selected image processing methods. Selection of image features and recognition methods for selected classes of objects. Testing and evaluation of selected song procedures and methods of individual tasks of selecting image processing procedures and methods of recognizing and assessing their quality for selected classes of objects.							
Teaching methods	Infor	Informative and problem lecture, discussions, implementation of projects							
Assessment method	Lectu	ure - w aration	ritten f	test; S asses	peciali	zation	works	hop - evaluation of	projects, verification of
Symbol of learning outcome				Lea	arning	outcor	nes		Reference to the learning outcomes for the field of study
LO1	The s digita	studen al imag	t knov jes, lis	vs the ts and	basic classi	conce fies the	ots of em.	the description of	

	The student can identifies methods and techniques for		
LO2	processing and recognizing digital images.		
1.02	The student can cites and uses the basic procedures for		
LU3	processing digital images.		
1 04	The student can interprets the results of digital image		
LO4	processing.		
LO5	The student can assess the quality of image analysis		
	methods used.		
LO6	The student is ready to work in a team, think and act		
	creatively.		
Symbol of		Type of tu	tion during
learning	Methods of assessing the learning outcomes	which the	outcome is
outcome		asse	essed
L01	written test on lecture content		<u> </u>
LO2	written test on lecture content		
LO3	written test on lecture content; evaluating the student's reports	L,	SW
LO4	evaluating the student's reports	S	W
LO5	evaluating the student's reports	S	W
LO6	discussion on the project, observation of students 'work in classes	S	W
	Student workload (in hours)	No. of	hours
	Lecture attendance	1	5
	Participation in seminar workshop	3	0
	Preparation for seminar workshop	1	5
Calculation	Completion of project tasks (including work on reports)	2	20
Calculation	Participation in student-teacher sessions related to the classes		5
	Preparation for and participation in the final test	2	0
	TOTAL:	1	05
		-	No. of
	Quantitative indicators	HOURS	ECTS
			credits
Student wor	50	2	
	Student workload – practical activities	85	3
