

I am a student at the Vitebsk State of Technological and I had an opportunity to study one semester in Poland according Erasmus+ . Therefore, now I am studying at the Bialystok University of Technology and my major is Programmer at the Faculty of Computer Science.

Have been studying at this university since the end of February, now I can say that the education level performed here is very high. I am sure in this because I had 6 professional-orientated subjects with highly-educated and patient teachers, who explained the most difficult questions for me in the easiest way. Moreover, all these 6 classes were about different spheres in programming, which helped me to expand my knowledge. All laboratory classes were not the same, so I was very curious to solve the given exercises and interested to see what will be next one. In addition, all teachers helped me when I had any complicated questions, for instance: showed the right solution or just a similar task, always gave many books connected with the subject, which solved my problems up.

If it comes to the accommodation on the campus, firstly it is very close to the university(it takes approximately 5 minutes to get to my faculty), secondly, my room is comfortable, I had an access to the Internet and sport facilities. When I had some problems with the lightning in my room, I went down to the administration office and they all were very polite to me, moreover solved my problem out, it means that all personal is ready to help you at any time.

And, the most quite city I have ever been to is Bialystok. Here I wonder how the city can be so green, everywhere are parks with people jogging, running or bicycling. The city is small so you can feel yourself safe as if you are in your hometown, moreover because of this reason it takes only 30 minutes to get to my favorite place- palace Branitskih, which is one of the famous sightseeings in the Bialystok.

In fact, I love Bialystok and studying at BUT, because this city is the ideal place to get a high level of education, but the main thing is that I found here many different nationality friends, talking about their own special cultures and traditions, trying national dishes and being close to each other.

I am very glad to be the part of this Erasmus+ and for the extremely awesome opportunity to spend the summer semester in Bialystok being the part of international team students.
