EDUCATION, RESEARCH AND INNOVATION IN HEALTH AND WELL-BEING STUDIES

Dedicated to Nursing Simulation Center Opening

- 6th International Conference “EDUCATION, RESEARCH AND INNOVATION IN HEALTH AND WELL-BEING STUDIES” is organized by the Faculty of Health Sciences and takes place during KVK International Week 2022. It gives a great opportunity to visiting foreign lecturers to present the results of applied research to their colleagues and to KVK lecturers to pride on the excellent results of interdisciplinary, international and cross-sectoral applied research carried out together with strategic partners.
- The theme of the Conference is connected with digital transformation in health care. Leading health systems view digital transformation as a way to become more consumer-friendly while simultaneously changing their operations, culture, and use of technology. Telemedicine, artificial intelligence (AI)-enabled medical devices, and blockchain electronic health records are just a few concrete examples of digital transformation in healthcare.
- The Conference offers a great opportunity to share the contemporary knowledge about digital education, learning and the web, as well as its integration and role within modern healthcare education and training.
