

Junior Project Manager

Place of Work: Białystok / Łódź

By joining our team:

- You will not sign any loyalties!
- You decide on the form of our cooperation - always having annual leave
- After the trial period, you sign a contract for an indefinite period - we want you permanently, not "for a while"
- You receive a satisfactory salary
- You have the opportunity to participate in training courses and conferences tailored to the needs of your position
- You decide about your working hours
- We will co-finance the MultiSport card of your choice
- You can attend our non-standard English language classes
- You work in international projects in a team that goes beyond the usual patterns and looks for out of the box solutions!
- You have our support while "at work" but, if necessary, also in "off-work" situations;)
- You become a member of the original LBPro LoyaltyBox program - you collect points and you choose your rewards
- You use the LBPro BookZone anytime you want
- You participate in competitions and events - check our social media and see "how we have fun"
- You have a parking space for your car, scooter or bicycle in front of a well-situated office.

What we expect from you?

- experience in managing a team
- organizational and planning skills as well as consistent implementation of the set goals
- leadership skills and a passion for responsibility
- teamwork and high communication skills
- high interpersonal skills - you must be able to get along with everyone
- analytical and logical thinking skills
- the ability to look for solutions outside the available schemes
- love for challenges and finding solutions to unusual cases
- good command of English - at a level that allows you to work freely with technical documentation and to create a user interface

What will you do?

- assessment of needed work resources and preparation of the team's work schedule
- supervising the timely implementation of the schedule as well as verifying the progress of work and the correctness of the tasks performed by the team
- designing system architecture - description, list of functionalities, interface
- conducting and commissioning functionality and performance tests of web and mobile applications
- diagnosing and removing the causes of occurring errors
- deployment of applications and publication of their new versions
- preparing, maintaining documentation and updating information about introduced changes
- contact with the client regarding deployment of the commissioned work
- customer support
- taking care of a good atmosphere in the team responsible for the project delivery.
